Metal Progress

January-June 1976, Vol. 109,

SUBJECT INDEX

Aircraft
How the Air Force Assures Safe, Durable Airframes, by Monty D. Coffin and Charles F. Tiffany 3-26
Superplastic Forming of Ti-6Al-4V Beam Frames, by C. Howard Hamilton and George W. Stacher 3-34

Aluminum alloys
Key Developments in Soviet Metallurgy, by William F. Marley Jr. and James R. Wamsley 4-46
Technology Forecast 1976 1-32

Automobiles
Potentials for More HSLA in Autos ... 2-26

Castings
Constitution Diagram for Stainless Steel Castings 2-55
Technology Forecast 1976 1-43

Ceramics
Technology Forecast 1976 1-40

Chromium
A Look at the Chromium Situation ... 6-24

Cleaning
Technology Forecast 1976 1-44

Coating
Technology Forecast 1976 1-44

Composites
Technology Forecast 1976 1-40

Constitution diagrams
Constitution Diagram for Stainless Steel Castings 2-55

Copper alloys
Technology Forecast 1976 1-32

Editorial
Answers to A-Power Problems, by Allen G. Gray 3-23
Incentives for Progress in Materials, by Allen G. Gray 2-23
Realities of the Energy Picture, by Allen G. Gray 5-23
Strategy for an Effective Materials Policy, by Allen G. Gray 4-21
Time to Move for Better Wear Control, by Allen G. Gray 6-23
What About After 1976?, by Allen G. Gray 1-25

Electroslag process
Key Developments in Soviet Metallurgy, by William F. Marley Jr. and James R. Wamsley 4-46

Electropolishing
Electrolytic Polishing System for Space Age Materials, by William C. Coons and Leonard R. Iosty 3-36

Failure analysis
Avoiding Failures in Welded Construction, by Richard Weck 4-26
Evaluating Component Failures: The Cure Can Be Worse Than the Illness, by Henry Suss 5-26

Fasteners
William Penn's Bolts Get Checkup, by James E. Hanafee 3-46

Fatigue failure
Avoiding Failures in Welded Construction, by Richard Weck 4-26

Finishing
Technology Forecast 1976 1-44

Forging
Quality Control on a Forging Line 5-50

Forming
How GE Optimizes Steel Usage in Sheet Metal Forming, by W. E. Johnson 6-40
Superplastic Forming of Ti-6Al-4V Beam Frames, by C. Howard Hamilton and George W. Stacher 3-34
Technology Forecast 1976 1-49

Friction welding
Friction-Welded Heat Pipes Stabilize Arctic soils, by Robert R. Reinking ... 2-40

Hardenability
A System for Classifying Heat-Treatable Steels, by John T. Sponzilli, Charles H. Sperry, and Jacob L. Lytell Jr. 2-32

Heat-resistant alloys
Technology Forecast 1976 1-36

Heat treatment
Production Ionitriding, by Bernd Edenhofer 3-38
Selection Guide to Thermocouples and Protection Tubes 3-68
A System for Classifying Heat-Treatable Steels, by John T. Sponzilli, Charles H. Sperry, and Jacob L. Lytell Jr. 2-32
Technology Forecast 1976 1-41

High-speed steels
Silicon Additions Improve High-Speed Steels, by Rene Schlatter and James Stepanic 6-56

High-strength steels
Potentials for More HSLA in Autos ... 2-26

Inspection
Technology Forecast 1976 1-54

Joining
Technology Forecast 1976 1-51

Lead alloys
Technology Forecast 1976 1-32

Magnesium alloys
Technology Forecast 1976 1-32

Materials systems
The Fishhook 6-52
The Trumpet 3-66

Metallography
Electrolytic Polishing System for Space Age Materials, by William C. Coons and Leonard R. Iosty 3-36
William Penn's Bolts Get Checkup, by James E. Hanafee 3-46

Metrication
English/Metric (SI) Stress Conversion Factors 1-68

Nickel alloys
Technology Forecast 1976 1-36

Nitriding
Production Ionitriding, by Bernd Edenhofer 3-38

Nondestructive testing
Thoughts on Emerging NDE Technology for the Nuclear Power Industry, by Gary J. Dau 6-34

Nuclear reactors
A Look at the Chromium Situation ... 6-24
Thoughts on Emerging NDE Technology for the Nuclear Power Industry, by Gary J. Dau 6-34

Pipe
Friction-Welded Heat Pipes Stabilize Arctic Soils, by Robert R. Reinking ... 2-40

Plasma-arc melting
Key Developments in Soviet Metallurgy, by William F. Marley Jr. and James R. Wamsley 4-46

Plastics
Technology Forecast 1976 1-40

Powder metallurgy
Technology Forecast 1976 1-57

Process control
Selection Guide to Thermocouples and

Protection Tubes....3-68

Profiles
Industry Profile: NASA Lewis Research Center's Materials & Structures Div....3-56
Industry Profile: The Second Taconite Decade....2-48
Industry Profile: University Institute Solves Industry Problems....5-61
Profile of a Chief Engineer: Z. P. (Phil) Saperstein....4-61
Profile of a Heat Treater: Glenn O. Ratliff....2-44
Profile of a Metallurgist-Manager: TRW's J. V. Peck....3-50

Quality control
Evaluating Component Failures: The Cure Can Be Worse Than the Illness...5-26
How the Air Force Assures Safe, Durable Airframes, by Monty D. Coffin and Charles F. Tiffany....3-26
Quality Control on a Forging Line....5-50

Steel metal
How GE Optimizes Steel Usage in Sheet Metal Forming, by W. E. Johnson....6-40

Shielded metal-arc welding
Recommended Electrodes for Shielded Metal-Arc Welding of ASTM Steels...4-66

Stainless steels
Constitution Diagram for Stainless Steel Castings....2-55
A Look at the Chromium Situation...6-24
Specifications for Russian Stainless Steels....4-54

Steelmaking
The Second Taconite Decade....2-48
Spectrometer Monitors Raw Materials for Blast Furnace....5-42
Technology Forecast 1976....1-46

Steels
Estimating Yield Strength From Hardness Data, by Robert A. George, Subimal Dinda, and Arthur S. Kasper .5-30
How GE Optimized Steel Usage in Sheet Metal Forming, by W. E. Johnson....6-40
Index of Tool Steel Tradenames....6-62
Potentials for More HSLA in Autos...2-26
Rockwell Hardness-to-Yield Strength Nomograph for Sheet Steel....5-34
Specifications for Russian Stainless Steels....4-54
A System for Classifying Heat-Treatable Steels, by John T. Sponzilli, Charles H. Sperry, and Jacob L. Lytell Jr....2-32
Technology Forecast 1976....1-29

Superplasticity
Superplastic Forming of Ti-6Al-4V Beam Frames, by C. Howard Hamilton and George W. Stacher....3-34

Taconite
The Second Taconite Decade....2-48

Testing
Estimating Yield Strength From Hardness Data, by Robert A. George, Subimal Dinda, and Arthur S. Kasper .5-30
How the Air Force Assures Safe, Durable Airframes, by Monty D. Coffin and Charles F. Tiffany....3-26
Rockwell Hardness-to-Yield Strength Nomograph for Sheet Steel....5-34
Technology Forecast 1976....1-54
William Penn's Bolts Get Checkup, by James E. Hanafee....3-46

Thermocouples
Selection Guide to Thermocouples and Protection Tubes....3-68

Thermomechanical treatment
Key Developments in Soviet Metallurgy, by William F. Marley Jr. and James R. Wamsley....4-46

Titanium alloys
Superplastic Forming of Ti-6Al-4V Beam Frames, by C. Howard Hamilton and George W. Stacher....3-34
Technology Forecast 1976....1-32

Tool steels
Index of Tool Steel Tradenames....6-62

Recommended Electrodes for Shielded Metal-Arc Welding of ASTM Steels...4-66
Technology Forecast 1976....1-51

Welding electrodes and filler metals
Recommended Electrodes for Shielded Metal-Arc Welding of ASTM Steels...4-66

Zinc alloys
Technology Forecast 1976....1-32

Now Available!

Keep your Metal Progress issues (plus Databook) in this handy storage file

Magazine file holds 12 issues of Metal Progress plus Databook. Open-top, cut-corner design . . . corrugated board with wood-grain finish. Comes with pressure-sensitive label, printed with Metal Progress logo.
Shipped flat, flips together without taping to form box 11¾ in high, 9 in. deep, 4 in. wide. Self-locking bottom. Stands firm and straight even when partially filled.
Price: $2.00 including shipping.
Send order with remittance enclosed to Metal Progress File Offer, American Society for Metals, Metals Park, Ohio 44073. Make checks payable to American Society for Metals. Ohio residents add 4% sales tax.

Metal Progress

SUBJECT INDEX

Mid-June-December 1976, Vol. 110, No. 1-8

In the index listings, the first number indicates the issue number, the second number the page in that issue. For example, 1-8 stands for Vol. 110, No. 1 (Databook issue), p. 8; 2-71 stands for issue No. 2 (July 1976), p. 71; and so on. Issue No. 7 (Heat Treating Buyers Guide and Directory) is not indexed.

Alloy steels

Calculating Hardenability Curves From Chemical Composition 1-129
Compositions of Former Standard SAE Carbon and Alloy Steels 2-47
Cooling Transformation Diagrams for AISI 4340 1-133
Guide to Gear Steels and Gearmaking Processes 1-19
Low-Temperature Impact Properties of Selected Alloy Steels 3-46
A New Look at Boron Steels, by M. Kishen Koul and Carl L. McVicker . 6-40
Properties and Applications of Heat-Resistant Stainless and High Alloy Steel Castings 1-72
SAE Alloy Compositions 1-17
What's Being Done About Steel Availability, by Harry E. Chandler..... 5-37

Aluminum and aluminum alloys

Aluminum in European Automobiles, by Donald F. Baxter 6-22
Compositions and Properties of Die Casting Alloys 1-98
Engineering an Aluminum Truck Axle, by Charles F. Powell 8-36
Filler Metal Selection for Welding Aluminum Alloys 1-188
Metallography of Aluminum and Aluminum Alloys 8-61
Properties and Applications of Nonferrous Powder Metal Parts 1-85
Properties, Characteristics, and Applications of Heat-Treatable Aluminum Alloys 1-88
Selecting Aluminum Alloys for Anodizing 1-172
Temper Designations for Aluminum Alloys 1-105

Anodizing

Selecting Aluminum Alloys for Anodizing 1-172

Atmospheres

Exothermic and Endothermic Furnace Atmospheres 4-68

Automobiles

Aluminum in European Automobiles, by Donald F. Baxter 6-22
Composition and Property Requirements of Automotive Fasteners Grades 1-41
Engineering an Aluminum Truck Axle, by Charles F. Powell 1-36
High-Strength Steels for Automotive Applications 1-38
Selection and Heat Treatment of Ferrous Alloys for Automotive Components 1-32

Cadmium plating

Guide for Selecting Minimum Thickness for Quality Coatings 1-175

Carbon steels

AISI-SAE Standard Carbon Steels ... 1-8
Calculating Hardenability Curves From Chemical Composition 1-129
Compositions of Former Standard SAE Carbon and Alloy Steels 2-47
Guide to Gear Steels and Gearmaking Processes 1-19
Machinability Ratings for Cold-Drawn, Carbon Steel Bars 1-200
What's Being Done About Steel Availability, by Harry E. Chandler..... 5-37

Carburizing

Equilibria for Gas Carburizing..... 1-136

Casting alloys

Compositions and Properties of Die Casting Alloys 1-98
Properties and Applications of Heat-Resistant Stainless and High Alloy Steel Castings 1-58
Specifications and Properties of Gray and White Iron Castings 1-74

Cemented carbides

Understanding the Sintering of Cemented Carbides, by Bengt O. Haglund and Bjorn Uhrenius 8-40

Chromium plating

Guide for Selecting Minimum Thickness for Quality Coatings 1-175

Cleaning

Guide to Ultrasonic Cleaning 1-170

Coatings

Guide for Selecting Minimum Thickness for Quality Coatings 1-175
Guide to Wear and Corrosion-Resistant Coatings 1-174

Cobalt alloys

Guide to Selection of Superalloys .. 1-108
Nominal Compositions and Properties of SAE Exhaust Valve Alloys 3-65

Columbium alloys

Composition and Properties of Representative Refractory Metal Alloys . 1-119

Cooling curves

Cooling Transformation Diagrams for AISI 4340 1-133

Coppers and copper alloys

Compositions and Properties of Die Casting Alloys 1-98
Metallography of Coppers and Copper Alloys 1-156
Properties and Applications of Nonferrous Powder Metal Parts 1-85
Properties and Applications of Widely Used Wrought Coppers and Copper Alloys 1-96

Corrosion resistance

Ferritic Stainless Steels: Corrosion Resistance & Economy, by Remus A. Lula 2-24

Die casting alloys

Composition, Properties, and Applications of Magnesium Alloys 1-98

Drop weight tear test

Modifying the Drop Weight Tear Test for Tough Pipeline Steels, by Hideki Kashimura, Masao Ogasawara, and Hiroshi Mimura 6-59

Editorial

1973-74 Shortages: Prospects for Repeat, by Allen G. Gray 5-29
Challenges to Steel, by Allen G. Gray 3-21
Doing Something About It, by Harry E. Chandler 6-7
Energy Crisis Still With Us, by Allen G. Gray 2-21
It's Like . . ., by Harry E. Chandler .. 5-5
Materials Substitution Takes on New Significance, by Allen G. Gray..... 6-21
A Ride With Dr. Franklin, by Harry E. Chandler 2-5
Science, Technology, Materials . . . in Washington, by Allen G. Gray..... 4-29
What's Communication?, by Harry E. Chandler 3-7
What's a PE?, by Harry E. Chandler . 4-5

Energy conservation

A Look Ahead to Materials and Processing in 1980, by Carl R. Weymueller 8-28

An Overview: the Commercial Heat Treating Industry, by John P. Benedict 4-42
Saving Energy in Heat Treating, by Carl R. Weymueller 4-32

Energy conversion
Materials Considerations in Coal Liquefaction, by J. B. O'Hara, W. J. Lochmann, and N. E. Jentz 6-33

Extrusion
Guide for Determining Backward Extrusion Parameters 1-197
Guide for Determining Forward Extrusion Parameters 1-196

Fasteners
Composition and Property Requirements of Automotive Fasteners Grades 1-41

Finishing
Guide for Selecting Minimum Thickness for Quality Coatings 1-175

Forging
Forging Ranges for Steels and Superalloys 1-195

Free-machining steels
AISI-SAE Standard Carbon Steels .. 1-81

Gears
Guide to Gear Steels and Gearmaking Processes 1-19

Gray iron
Specifications and Properties of Gray and White Iron Castings 1-74

Hardenability
Calculating Hardenability Curves From Chemical Composition 1-129

Heat-resistant alloys
Alloy 903 Helps Space Shuttle Fly, by H. W. Carpenter 3-24
Forging Ranges for Steels and Superalloys 1-195
Guide to Selection of Superalloys .. 1-108
Properties and Applications of Heat Resistant Stainless and High Alloy Steel Castings 1-72
Recommended Procedures for Turning Superalloys 1-202
Standard Stainless and Heat-Resisting Steels 1-60

Heat treatment
Cooling Transformation Diagrams for AISI 4340 1-133
Equilibria for Gas Carburizing 1-136
Exothermic and Endothermic Furnace Atmospheres 4-68
Heat Treating With Water-Gas Atmospheres, by Glenn R. Ingels and James D. Blanchard 4-58
An Overview . . . the Commercial Heat Treating Industry, by John P. Benedict 4-42
Properties, Characteristics, and Applications of Heat-Treatable Aluminum Alloys 1-88
Saving Energy in Heat Treating, by Carl R. Weymueller 5-32
Selecting Induction Heat Treating Parameters, by Gerald J. Roe 4-62
Selection Guide to Thermocouples and Protection Tubes 1-144
Selection and Heat Treatment of Ferrous Alloys for Automotive Components 1-32
Temper Designations for Aluminum Alloys 1-105
Typical Heat Treatments and Characteristics of AISI Tool Steels 1-138

High-strength steels
Compositions, Properties, and Producers of High-Strength Steels 1-47
Modifying the Drop Weight Tear Test for Tough Pipeline Steels, by Hideki Kashimura, Masao Ogasawara, and Hiroshi Mimura 6-59
Selecting Carbon Steel Wires for Gas Metal-Arc Welding HSLA Steel 1-84
What's Being Done about Steel Availability, by Harry E. Chandler 5-37

Hydrogen embrittlement
How High-Pressure Hydrogen Affects Stainless Steels, by Anthony W. Thompson 2-30

Induction heat treatment
Selecting Induction Heat Treating Parameters, by Gerald J. Roe 4-62

Inertia welding
Problem Solving With Inertia Welding, by Donald F. Baxter 2-37

Iron alloys
Guide to Selection of Superalloys .. 1-122
Properties and Applications of Ferrous Powder Metal Parts 1-78
Selection and Heat Treatment of Ferrous Alloys for Automotive Components 1-32

Machining
Guide for Machining Standard AISI Stainless Steels in Automatic Equipment 1-201
Machinability Ratings for Cold-Drawn, Carbon-Steel Bars 1-200
Recommended Procedures for Turning Superalloys 1-202

Magnesium alloys
Compositions and Properties of Die Casting Alloys 1-103

Materials engineering
A Look Ahead to Materials and Processing in 1980, by Carl R. Weymueller 8-28
Materials Engineering in the Arctic, by Harry E. Chandler 8-52

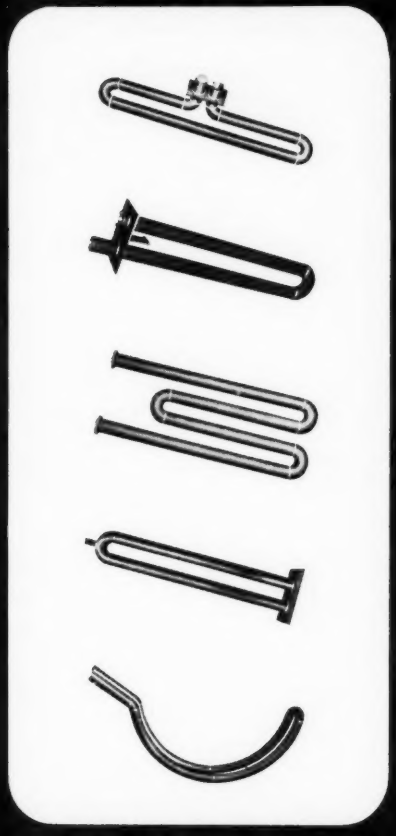
Long-lasting, low-cost PSC RADIANT TUBES SAVE ENERGY, SHORTEN DOWN-TIME.



PSC Radiant Tubes, fabricated from sheet alloy, can be of tremendous help to you in the current energy crisis. Their light weight, in relation to other types of tubes, affords great savings in fuel usage, installation and cycle-time.

Our fabricated bends, of the same metal and thickness as the legs, produce smooth interiors that promote uniform flow of gas and minimize carbon build-up and burn-out.

Stock tooling on hand for commonly used sizes of bends offers substantial savings. PSC Radiant Tubes are precision assembled in many designs.

POWDER AND BLADES FROM Adolf Meller

use them, singly or in combination, for your METALLOGRAPHY SPECIMEN preparation!

Their performance is guaranteed to exceed — significantly — anything you're presently using!

Here's why . . .

ALUMINA POWDERS

for coarse and fine grinding, and for rough and final polishing. 99.98% purity, or 99.98 *Agglomerate Free,* or 99.992% Ultra High Purity. Expressly QUALITY CONTROLLED for batch-to-batch uniformity — means repeatability!

DIAMOND SAW BLADES

specifically adapted to sawing glass, quartz, germanium, sapphire, other hard materials. Options of copper or steel; thicknesses between 0.2 mm and 1.0 mm; diamond crystal size between 60 and 400. Has extreme resistance to fatigue failure.

Test them in your operations — you'll see immediately the superiority in their performance.

Write or phone for test samples (on a limited basis) and technical literature.
